Warranty

At Marset, our luminaires not only provide the light you need but also create spaces, moments and emotions. Each design is made to last, with a quality that reflects our passion for detail and sustainability. We're confident in what we do, so we offer a 5-year warranty on all our products - because trust isn't imposed; it's steadily built, project by project, light by light.

Applicable conditions: https://www.marset.com/usa/warranty

Need it urgently?

We've designed a Quick Shipping program to offer you greater flexibility on selected items.

- Designs featuring this icon (⏲) will be ready in just three days.
- You can request up to 3 units per order.
- We recommend placing separate orders for Quick Shipping items for more efficient delivery.

Standard shipping conditions and minimums apply.
See the full list of Quick Shipping items on page 250.

Ambrosia Pro, Ciszak Dalmas

Ambrosia Pro, Ciszak Dalmas

This collection has been extended with a version designed specifically for workspaces that require more controlled lighting. It includes a cell structure with independent lenses that project more directional lighting.

It is available in a horizontal suspension version in three finishes: matt gold, aluminium, black - while the structure that fixes it to the ceiling is always in black.

Babila demonstrates that, when it comes to a design, the material can be as important as the shape. This outdoor wall sconce is of polished stainless steel, a circular object that produces a panoramic effect, reflecting its surroundings. It is not designed to be an architectural element, but rather a simple and beautiful design that draws attention, whether on or off, as it allows us to catch a glimpse of the daily life occurring around it.

Bicoca, Christophe Mathieu

Bicoca. Christophe Mathieu

The Bicoca is born with the optimism of brightening life and accompanying the good times, wherever you go. This colorful, lightweight portable lamp projects an intimate light that adds warmth to all your personal spaces.

Made of polycarbonate, Bicoca begins with an overlay of basic geometric figures, with a tiltable shade to direct the light. Two accessories increase the applicability and versatility of the lamp.

Bohemia, Joan Gaspar

At first glance, the Bohemia appears to be made of blown glass. However, the lamp's large size ruled out that material. Instead, the designer settled on polycarbonate to create an exciting, organic, translucent profile that integrates two volumes into a single shape. The design allows for a large shade in different colors with a white interior for pristine reflection.

A698-016

A technologically innovative design that brings back the sense of touch. Moving the Bolita dims or boosts the light, an interplay that captivates with its beautiful visual effect. Bolita seeks out that user interaction.

The idea of Florian and Sebastian at the kaschkasch studio was to design a lamp in which the dimming process was mechanical and not electronic.

Cala, Joan Gaspar

The beauty exuded by the Cala stems from its simple, synthetic and essential form: a shade that embraces the light without containing it, letting it escape to yield very warm lighting.

With a structure made of oak or black lacquered metal, the Cala is an iconic Marset design defined by that most valuable of pairings: form and function.

Caramel, Joan Gaspar

Caramel collection surprises with its material beauty, as though it were an illuminated sculpture. This wall lamp by Joan Gaspar uses glass of a clearly decorative nature to create a circular form that envelops the light. A design that gives full prominence to the aesthetics of this hard, shiny material: when illuminated, Caramel is surrounded by a soft halo of light, and when turned off, it creates a graphic play on the wall. Caramel emits diffused, soft, and warm reflecting light.

Cluster, Accessory

The cluster gives you absolute freedom to design the light you desire. With it, you can illuminate large spaces and create different compositions.

Take into account the total power in watts, the power of the driver, and the wire entry points of the canopy. The total wattage of the selected lamps cannot exceed the max wattage of the canopy's driver. Therefore, you must choose your canopy/driver by the power required. Finally, the number of lamps installed in a single canopy cannot exceed the number of wire entry points of that canopy. Customize your space with our Dipping Light cluster configutaror at configurator.marset.com/dipping-light

Dipping Light, Jordi Canudas

Dipping Light, Jordi Canudas

Beyond its function as a lamp, the Dipping Light seeks to excite. When it's turned on, its different shades of paint sift the light, creating a magical ambient effect. When it's off, its colored glass sphere is an object charged with beauty, and an eye-catching design piece for a shelf, bedside, or table. The various layers of paint draw concentric circles and capture the light, moderating its intensity. The paint becomes the shade, colouring and texturizing the light.

A620-086

Djembé, Joan Gaspar

Using a rotomolding technique allowed the designer, Joan Gaspar, to design a fixture with vastly different interiors and exteriors: its outside recalls the texture of a stone, giving off a perception of great weight, emphasized by its volume. In the spacious interior you'll find a smooth, white space perfect for the reflection of light. Djembé is a lamp designed for use in public spaces that seeks to bring beauty and an unbeatable quality of light.

Architecture, lines and distinctiveness. A bollard light that reveals its empty interior. Domus hides its light, refusing to reveal where it comes from, and projects a subtle angle of illumination. The beauty of this new bollard lies in how its form plays with and defines its light. It can be installed individually but takes on a sculptural feel in combinations of two or three units, the beam of light spreading in different directions and achieving greater breadth.

FollowMe, Inma Bermúdez

Charismatic, lightweight and compact, the new FollowMe in a glossy ivory-white finish incorporates technological details: three colour temperatures with different light tones; an on/off button that also acts as a progressive dimmer to adjust light intensity; a longer-lasting battery; and, in addition to the USB-C cable, it offers an individual or multiple charging base as an accessory for recharging one or several units at the same time.

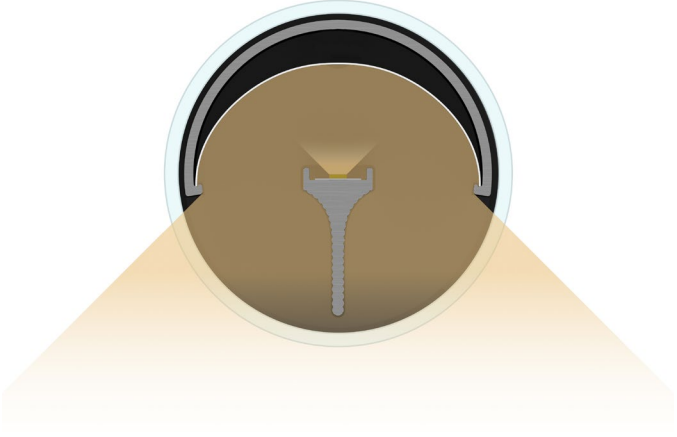
Fris, Joan Gaspar

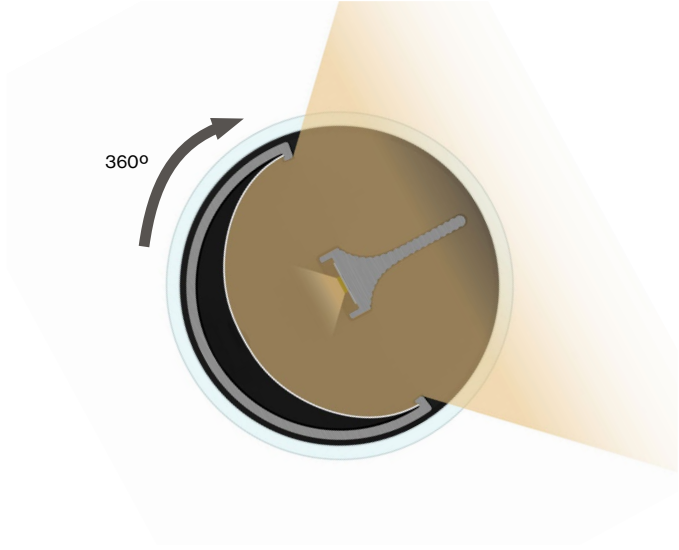
Drawing thin beams of light in a space with each one of them pointing in any direction. This is why we have created Fris, a multi-purpose lighting system, available in a wall/ceiling or pendant version, which allows you to combine several units in different sizes and positions, each one aiming its own beam of light. What makes it unique is that the glass not only protects the light, but also provides a mechanical function, suspending the whole system and allowing the lamp to rotate and the light to be steered in a certain direction. There is also a more technical Pro version where the light is distributed in cells with independent lenses, achieving a UGR of under 19.

Delta de Oro
Premios ADI 2024

Fris

- Diffuse decorative light.
- LED 2700K and 3000K CRI90
- 24V product, can be connected to each other.
  Max. 5 Fris 80
  Max. 3 Fris 155
  Max. 2 Fris 215
- Power supply not included, order separately.





Fris Pro

- Direct light for tasks requiring higher luminance and increased glare control.
- LED 3000K CRI90 (4000K available upon request).
- Power supply not included, order separately.
They cannot be connected to each other.
- LED beam angle: 55º
(30º and 65º available upon request)
- Tunable White 2700K 4000K version (available upon request).

This system makes it possible to compose light structures and to join a set of lamps by means of different assembly and hanging accessories. In the pendant version, each Fris unit is supported by a strap, so that several can be placed horizontally, in line, one on top of the other, or perpendicularly, creating intersections of light. They can also function separately as an individual lamp. The other version can be fixed to the ceiling or wall.

Fris offers a very versatile and functional design for precise lighting of any type of project. An ingenious system that boldly tackles a previously unresolved issue: to have a set of lamps where each one directs the light individually.

Funiculí, Lluís Porqueras

Funiculí is a revamped edition of a lamp originally designed in 1979. Lluis Porqueras always sought an absolute simplicity in his designs, stripping everything superfluous to leave only the essence of the simple, useful object.

Using the same double-clip mechanism of the original, this scaled-down model allows easy height adjustment and 360 degree shade rotation to fit the needs of any room or user.

RIOPELL

Gambosa. Mathias Hahn

Geometry, balance and colour. A table lamp that challenges traditional rigidity and looks like a sculpture. Its design, made of steel, is a combination of geometries in balance that interact harmoniously with each other. Its varied palette of colours allows you to create versions that range from subdued to incredibly expressive.

LED-Ginger, Joan Gaspar

The LED-Ginger collection is notable for its great simplicity of form, its lightweight appearance and reflected direct light. A design for any type of project.

Available in two very different materials, wood or metal, it provides a warm glow with no glare, illuminating just the areas that need it.

LED-Ginger Outdoor, Joan Ga

LED-Ginger Outdoor, Joan Gaspar

The LED-Ginger collection is moving outdoors, with numerous sizes of wall sconce and bollard as well as a large-scale lamppost style light. This outdoor collection also introduces a unique new rust brown finish, with a deep, warm glow, alongside the standard black-white metal finish familiar to the indoor version.

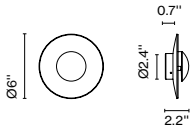
LED-Ginger 15C IP65

Code	Finish
A662-649-31	Rust Brown
A662-649-39	Black-White (RAL 9005-9010)

Materials
Diffuser: Aluminum
Dissipater: Aluminum
Structure: Stainless steel

Dimmable: Yes
Integrated dimmer: No
Dimming protocols: Based on specified driver.

Product type: Wall / Ceiling
Light source: LED SMD 24Vdc 5W 2700K CRI90 495lm
Luminaire: (Power supply not included) 67 lm - Black-White
(Power supply not included) 27 lm - Rust brown
Weight: Net 0.8 lb – Gross 1.1 lb
Package: 9.4 x 8.3 x 3.9 " – 1.1 lb Vol – 0.3 ft^3
Product notes: 24V remote power supply to be ordered separately, see pg 130.
LED included



Dimmable

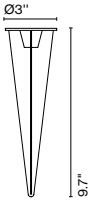
Package: 5.5 x 5.5 x 11'' - 0.9 lb – Vol - 0.2 ft³



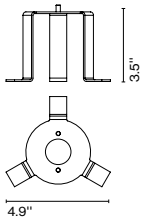
Concrete fixation plate

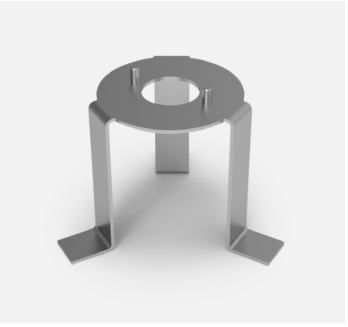
Code	Finish
A662-556	● Stainless steel

Materials
Structure: Stainless steel 316 L

Product type: Accessory for LED-Ginger Bollards.
For fixing luminaire location in wet concrete/cement.

Weight: Net 0.7 lb – Gross 0.9 lb
Package: 5.9 x 5.9 x 5.1'' - 0.9 lb – Vol - 0.1 ft³

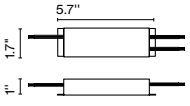




LED-Ginger: Power Supply - Dimmable

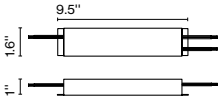
Code	Description	Dimming
968-230	60W - 24V	0-10V

Product type: Power supply
INPUT: 120-277 VAC 50/60Hz
OUTPUT: CV 24V DC 60W max.



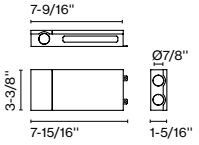
968-233	100W - 24V	0-10V

Product type: Power supply
INPUT: 120-277 VAC 50/60Hz
OUTPUT: CV 24 VDC 99.6W max.



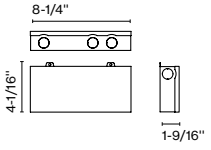
A968-372	60W - 24V	TRI-DIM (Triac / ELV, 0-10V)

Product type: Power supply
INPUT: 120-277 VAC 50/60Hz
OUTPUT: CV 24V DC 60W max.



A968-373	96W - 24V	TRI-DIM (Triac / ELV, 0-10V)

Product type: Power supply
INPUT: 120-277 VAC 50/60Hz
OUTPUT: CV 24V DC 96W max.



Product notes: Use these power supplies for LED-Ginger Bollards and LED-Ginger 15C / 20C.

Total wattage of all connected fixtures must not exceed canopy or driver wattage. Make selections accordingly.

The installation and location of the remote LED driver and any required enclosure must be in accordance with applicable codes and laws and will be the exclusive responsibility of the installer.

Konoha, Yabu Pushelberg

Konoha is a simple, discreet wall lamp with a shade over a directed spotlight that turns through 330°. The shade, like a hat, covers the spotlight, allowing the light to be directed upwards, bounce off the inside and project a beam of soft light, creating warm ambient lighting. If instead the spotlight is focused downwards, it projects a beam of direct light, turning the fixture into a reading lamp.

Lauro, J. Pérez Mateo and P. Aragay

Volume, solidity, and legacy. Lauro is the reissue of an iconic lamp made of steel and methacrylate, first launched in 1973. Its structure and materials connect us with the emotional language of the past.

Its shade allows the light to be directed by rotating it and adjusting its height along the structure. This luminaire is striking in its presence, a true example of how good design endures over time.

Ledtube, Daniel López

Its ergonomic design beckons you to move it in any direction, up to 360º, and its use is very intuitive. When opened, it turns on automatically; when closed, it turns off and hides away in the wall, like camouflage. It's so versatile it can be installed vertically or horizontally, adapting to the needs of your space. Now we present a new surface edition, just as functional but more compact. The switch is integrated in the base, maximum ergonomic design, with absolute flexibility to move it in any direction.

Mercer, Joan Gaspar & Javier M. Borràs

The beauty of the Mercer stems not only from its essential shape, but also from how its materials blend together. The transparent blown glass structure surrounds the textile shade, which seems to float, conveying a sense of airiness and sophistication.

Milana, Jaume Ramírez

The Milana is a sleek, versatile form with an almost imperceptible point of light. The base lamp offers an impeccable downward-directed light, but when a shade is added, the light escapes upward, illuminating the lamp itself. An additional counterweight version gives the user complete control over the light.

Cluster Milana

The cluster is a system that allows several pendant lamps to be connected to a single power point. It provides complete freedom to create with light, illuminate large spaces, or design compositions with multiple pendant lamps. See the available Clusters on pages 59 and 60.

Plaff-on!, Joan Gaspar

Plaff-on!, Joan Gaspar

A good design is one that endures. So it is with Plaff-on!, a lamp that has been illuminating walls and ceilings for almost ten years. Its hand-blown white glass diffuser appears to float, detaching from the ceiling and the circumference that surrounds it, and its light filters upward to create a luminous halo. Indoors, outdoors, with or without signage, the Plaff-on! now offers multiple options in one lamp that can now conquer the outdoors as well, now with a new finishing in rust brown.

Pleat Box, Xavier Mañosa & Mashallah

The idea behind the Pleat Box is a sophisticated combination between a digitally designed crease in a piece of cloth and a silhouette that is applied to a ceramic base. The alchemy of the craft process leaves unpredictable traces, small marks in the metal glaze, tiny cracks in the polish... little flaws that mark the unique personality of every lamp.

Polo, Joan Gaspar

The fluidity of its movements and its integrated LED technology make the Polo a light source with a great precision and versatility.

The Polo comes with a diffuser made from injected aluminum and a rotary switch located at the top of the shade.

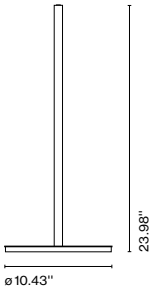
Ø1.57 x 26" - 2.2 lb – Vol - 0.01 ft³



Ringo, Joan Gaspar

A large pendant or ceiling lamp that accentuates material rather than form. Its large size is in keeping with its function, since it's been designed to illuminate large spaces with considerably high ceilings and contemporary architectural projects requiring a great deal of light. Switched off it's a forceful object with a strong presence; switched on it manages to make the material less dense and its design weightless.

Ringo 70

Roc, Joan Gaspar

Wall light for indoor and outdoor use, with a pressed glass diffuser. Its wavy shade covers the light, softens it, and creates an inviting atmosphere. Now, Roc evolves to provide even more light and expands its collection with two new sizes and a white finish. All versions include an accessory that acts as a filter to reduce glare and screen the light. Roc resembles a shining block of ice, with an irregular texture that begs you to touch it.

Sips, Christophe Mathieu

Ingenious, minimal and decisive, this is the Sips portable lamp. An understated, timeless design with a very clear purpose: to create a distinctive, intimate lighted space, even outdoors.

With a small opaque shade, the Sips illuminates the table directly but without dazzling or overpowering the space.

Soho, Joan Gaspar

The striking, industrial shapes in the Soho collection are reminiscent of the lamps that were traditionally used in markets and taverns, but they contrast through the use of thoroughly contemporary materials and textures.

It is made from rotation-molded polyethylene, a technique that allows us to offer it in different sizes.

Tam Tam, Fabien Dumas

The Tam Tam is a festive and versatile collection that offers several options to add color and originality to all types of interior design projects. The idea is to be able to aim the light in any direction, making this fixture perfect for long or narrow spaces.

This year, the collection is updated with new colors and a semi-matt finish on all models.

The W, PerezOchando

Unfold the light or fold it. The new design of Estudio Perez Ochando proposes a lamp of large format, flexible, thought to adapt to the different necessities of lighting big spaces.

A large black vertical structure is the main shaft from which a number of rods emerge; some can be moved upwards to expand the light and others downwards to focus it.

The W

Oversized item. Special freight policy applies.
See *Freight Exceptions* on page 254.

Technical note

The watts shown on the pricelist are the actual watts of the luminaire (including both LED and driver); otherwise, the watts are expressly shown as being for the light source. Similarly, the lumens may be for the luminaire or light source, as shown on the pricelist. For more information, you can find lighting data on our website.

Shipping Policy

a. Shipping Origin: Barcelona, Spain
b. Marset ships product directly from our factory in Barcelona Spain to the U.S. and Canada only.
c. Orders are typically shipped by air with FedEx and have travel times of 2 days.
d. Marset reserves the right to reject shipping requests to any locations not within the U.S. or Canada.
e. Marset reserves the right to only allow shipments to the country in which the purchasing entity is registered.
f. Marset orders ship on Marset accounts, and Marset cannot accommodate ex-works or third-party pickup from factory.
g. Orders/goods unable to be delivered due to client/site restrictions and/or the inability of the recipient of the order/goods to coordinate with the courier may incur storage fees as calculated by the courier. These fees will be billed to the original purchaser of the affected order/goods.

Freight Exceptions

a. Oversized items
    i. Standard freight charges apply to all Marset products with the exception of oversized products as indicated in the pricelist. These include but are not limited to: Soho 112, Bohemia, Djembe 100.38, Djembe C100.38, Ginger XL 42, Jaima 71, Jaima P207 and P307 floor lamps, and Ginger 60/298.
    ii. Orders containing 1-3 oversized items will incur an additional flat fee of $250 per oversized item, in addition to the standard shipping charges outlined in the table under section five above.
    iii. For orders containing more than three oversized items, or containing a mix of oversized and standard items, Marset reserves the right to quote freight separately. These shipments may be made via air or ocean depending on logistical necessity and/or client preference.
b. Special Discounts
    i. Standard freight charges do not apply to orders with special discounts. Any specially discounted orders may have the freight charge assessed separately.

Quick Ship

a. Items marked as Quick Ship have a maintained stock level and will generally be available to ship within 1 week.
b. An order can contain no more than three units of any Quick Ship SKU, and these items cannot be combined with non-quick-ship items on the same PO.
