

Ambrosia

Ciszak Dalmas

marset

Its design stems from a tubular structure with gentle lines that attaches to the ceiling, allowing the light to descend and gently illuminate any type of project. It is this diffuse light that fills the space, adding beauty.

Its linear and unique design, a nearly flat segment of light, was made modular and asymmetric to create a soft and surprising lighting system.

Accessories guide

The Ambrosia offers numerous powering options, as well as extension poles to increase the fixture drop. If chosen, the items below should be selected at time of specification.

The Ambrosia 120 and 180 have a rigid stem on one end, so can accommodate a maximum of three height extension poles of either size. The Ambrosia 210 and 315 have rigid stems on both ends, so can accommodate a maximum of six height extension poles of either size (three per end). Default drop length for all Ambrosia fixtures, without extension poles, is 10.5 inches. Maximum drop length, utilizing three 23.6-inch poles per end, is 81.3 inches.

Power supplies for this fixture are sold separately. The all-in-one solution for power is the Canopy (A666-213-1*), which contains the 60W 0-10V driver and mounts over a junction box.

For recessed or remote-driver installation, select only the Power Supply (968-230), and Outlet Box Cover Plate (A666-219-1*).

Alternately, the fixture can be powered by a UL/ETL-certified 24V power supply from a third-party supplier.
