

# LED - Ginger

## Joan Gaspar

marset

Unfold the light or fold it. The latest from PerezOchando is a flexible, large-format lamp designed to adapt to the different lighting requirements in large spaces. A large black vertical structure is the main shaft from which a number

of rods emerge; some can be moved upwards to expand the light and others downwards to focus it. The rods all have a suspended spotlight that projects the light downwards or in a large, sharp beam.
