

Energy Labelling Regulation

COMMISSION DELEGATED REGULATION (EU) 2019/2015 [...] with regard to energy labelling of light sources (and COMMISSION REGULATION (EU) 2021/340) Annex V Product information sheet.

With regard to labelling, Marset specifies the characteristics of the light source and energy class of the product in the technical data sheet in the established format. This is made available to the user in the product information sheet as specified in COMMISSION DELEGATED REGULATION (EU) 2019/2015 [...] with regard to energy labelling of light sources and COMMISSION REGULATION (EU) 2021/340 Annex V Product information sheet.

The energy efficiency class of the light source is shown as follows:

“This product contains an energy class X light source” where X shall be replaced by normal dynamic range (A-G).
