

LIGHT + BUILDING PREVIEW

DARC'S WOMEN OF LIGHT

LINDSEY ADELMAN

INMA BERMUDEZ

Inma Bermudez studied at the School of Industrial Design at the University Cardenal Herrera CEU in Valencia, as well as one year of practical studies at the School of Applied Sciences and Design of Pforzheim, Germany. She began her professional career in industrial design working for German design studio's Idea, Busse Design and Prodesign. Every summer since 2002 Bermudez has also collaborated at the Vitra Design Museum and Centre of Georges Pompidou workshops in South West France.

In 2006 she entered into a contract with Swedish brand IKEA and formed part of the internal department of Design in Almhult, Sweden. She has since strengthened her affiliation with IKEA as a freelance designer working on a variety of products yearly. Since 2007, Bermudez has been a part of the internal design department at the Valencian porcelain company Lladro where she develops, along with the rest of the design team, pieces for the more classic porcelain product line. More recently Bermudez collaborated with Marset to design the popular, FollowMe table lamp. Portable and rechargeable, FollowMe is a table lamp that is small, warm, and self-contained, with a swinging lampshade made of white polycarbonate with an oak handle.

Jette Scheib studied industrial design at the University of the Arts, Berlin and since 2005 has worked as an independent interior and product designer specialising in home accessories. Her work can be plain and pure or narrative and playful, but often with a little twist that adds a new context or dimension to a functional object. Inspiration is everywhere for Scheib, whether it is art, music, people and their stories, habits, clichés or simply life itself that feeds her creativity. Herring also collaborated with innermost on the Membrane pendant, her latest creation for Oblure takes inspiration from childhood visits to the circus, Trapeze is as much a single pendant as it is an endless system of possibilities. The square tube has a built in connector, which makes it easy and fun to mount multiple lamps together. The idea of a system of lamps came before the solitaire Trapeze pendant and has been an important cornerstone during the design process. After you have mounted the lamp in the ceiling you can still direct the light up, down, to the side or in two directions at the same time.
